

THIS SKI RESORT HAS

A TRAUMA CENTRE

The Trauma Centre uses orthopedic medical specialists for a prompt treatment of muscular skeletal apparatus **trauma following of a ski accident**.

All care benefits **are charged to the user**, based on the rates displayed at the Centre. Payment is made at the same Centre.

In case of a ski accident the user can choose to use the trauma center or the Emergency Unit of the "Umberto Parini" hospital of Aosta (defrayed by the Regional Health Service)

SNOW CARE INSURANCE POLICY
By adding only 2,50 euro to the cost of the skipass, you may ask for the Snowcare insurance policy at the ticket office. You will thus be insured in case of a ski accident.

ATTENTION:

the snowcare insurance of the rescue service (ski patrollers) **is valid exclusively in case of an intervention at the place where the accident occurred.**

For free benefits (except for the amount of the franchise, if applicable) you will need to deliver the rescue form issued by the ski patrollers, to the Trauma Centre Doctor, together with the skipass.

OTHER INSURANCE

Holders of **other insurance** may ask their insurance company to reimburse the amount paid for at the Centre.

The Trauma Centre is open from **December to April** (depending on snow conditions) **everyday**, including holidays, from 9.30 am through lunch break until closure of ski lifts.
